« Where is the future of intralogistics headed? »»

The future of warehouse management and distribution centers requires maximum flexibility, full automation, and smart data.

Digital transformation is shuffling the deck in the business world and establishing new sets of rules. That is also true for intralogistics, which is evolving from large, rigid systems into modular, flexible, and software-driven solutions – robot-supported and self-optimizing.

That is exactly where the Swisslog philosophy makes its impact. Decades of experience have made Swisslog the technological pioneer in a new era of flexible, robot-supported and data-driven solutions. Thanks to our partnership with KUKA, we also have unique technological expertise in the field of Industry 4.0.

We shape the future of intralogistics by introducing a new era of robotic, data-driven and flexible automated solutions.

« Am I flexible in the face
of changing market
requirements? »

Our future-proof solutions can always be tailored to your strategies, protecting your investment.

Every industry has different logistics and supply chain requirements. Our solutions are perfectly customized to your needs and guarantee the optimal flow of goods at a low cost per pick. Numerous reference sites provide ample evidence. They also demonstrate our in-depth understanding of the industries and the process expertise of our competent project teams. We always find the most effective solution with the best price-performance ratio, transparent processes, and the most flexibility. So that you can respond to changing business conditions at any time and adjust your capacities as needed to accommodate increasing throughput.

EVALUATION & IMPLEMENTATION OF THE SOLUTION

« How do I meet my targets for throughput, staffing, and cost per pick? »

Our robotics applications guarantee maximum speed, accuracy, and efficiency so that your customers are satisfied.

Customer requirements for goods diversity, individualization, freshness, and delivery speed are constantly growing. Only a very high degree of automation and smart-data systems can meet today's many demands. Our automated solutions deliver peak performance, building the basis for future-proof intralogistics. We are with you every step of the way, from the conceptualization of your distribution center (design), to the construction phase (develop), and through ongoing operations (deliver). That's how we guarantee that you can meet and exceed your customers' expectations, right on schedule.

Up to
1000 CASES
per hour
with ACPaQ

Our services

- ENGINEERING COMPETENCE
- PROJECT MANAGEMENT
- INTEGRATION FROM THE BUILDING TO THE SYSTEM
- COMMISSIONING

Up to
5X FASTER ORDER FULFILLMENT
on average based on CarryPick

20-30 MINUTES
from order to picking anywhere and anytime

« How do I make sure that the system will run 24/7 and reliably cope with peak times? »

Our comprehensive service portfolio and smart software solutions ensure reliable performance and 100% availability.

Seasonal peaks regularly pose major challenges to the logistics industry. That's when absolute availability at the highest throughput is a must. Thanks to our comprehensive support, including 24/7 helpdesk, preventive maintenance, remote monitoring, condition monitoring and lifecycle management, our systems are reliable when it really counts. Software-driven goods flow optimizes energy consumption in the entire system, and you can always rely on the best results without downtime.

Hand in hand with KUKA, we are your automation powerhouse and deliver one-of-a-kind solutions for your entire value creation chain.

Imagine having a system that never gets old, one that you can flexibly modify to changing conditions at any time, putting you ahead of the competition. As a member of the KUKA Group, we are the world's Industry 4.0 leader with unique technological competence. As such, we offer individual solutions for your entire value creation chain and will partner with you over the entire product lifecycle.

Complete solutions for a new era - our end-to-end service spectrum:

Conveyor system	Conveyor system	Automated carton & single-item picking	Automated pallet transportation	Inventory manag. & material flow – SynQ	Operation
Miniload crane	Pallet stacker	Depalletizing and palletizing system	CarryPick order fulfillment system	SAP EWM	Maintenance
Shuttle system	Pallet shuttle/ loading/unloading system		Mobile platform/ Omnimove	Automation controls for conveyors, etc.	Modernization
AutoStore storage system					

Swisslog has locations in over 20 countries.
