

GCS* WMS Warehouse Management System

The warehouse management optimisation solution

Whether you're a distributor, industrial company or logistics provider, GCS WMS is the solution for you. A modular system with powerful settings, this software package has been designed to perfectly integrate into your company's culture and organisation, whatever the volume of flows that needs to be processed.

The Solution

The new version of GCS WMS opens up to new technologies and widens its range of uses. Original ergonomics simplify the Graphics User Interface (GUI) dialogue and enable immediate rollout on all equipment fitted with a Web browser. GCS WMS is recognised as the solution to business issues. The distributor, industrial company or logistics provider thus has a powerful tool that can handle a wide variety of products in a number of sectors of activity, with optimal organisation and processing. GCS WMS is the universal warehouse management tool:

- Handle finished and semi-finished products, raw materials
- Optimise a wide variety of flows: stocked, direct, cross-docking, allocated, as well as reverse logistics
- Manage co-packing, co-manufacturing, postponement, kitting and nomenclatures
- Integrate natively vocal and radio technologies, RFID Ready. GCS WMS also interfaces with the most diverse automated systems
- Model all classic Supply Chain processes and look to the future by integrating efficient traceability, triangulation (route optimisation), and yard management functionalities European compliance CEE 178/2002
- Adapt to the company's environment thanks to its modularity and powerful settings. Additional modules and a number of options can be activated or deactivated depending on the field
- Fit standard EANCOM-compatible data exchange connectors GCS WMS communicates with your company's different software packages, as well as with the main ERP solutions on the market
- Help increase your competitiveness by optimising storage capacities, controlling delivery constraints, accelerating processes and providing you with global visibility of your activity

* GCS : Generix Collaborative Supply Chain
