

Westernacher Consulting - Solutions for Logistic Service Providers

Optimise your Warehouse Billing with Westernacher Warehouse Billing Solution

Warehouse Logistics

SAP® Certified
Powered by SAP NetWeaver®

Are you able to bill your services accurately and efficiently?

Manage your billing process with Westernacher Warehouse Billing Solution built on SAP EWM technology

Leading logistics service providers (LSPs) offer customer orientated services and provide itemised bills that are accurate and can be produced on demand.

To achieve this, technology needs to be supported by “best in class” processes. Without this combination LSPs find themselves faced with numerous challenges resulting in a plethora of workarounds.

Typical pain points with warehouse billing include:

- Cost allocations are based on very general assumptions and some guesswork
- Inadequate cost tracking can lead to non-recovery of costs
- Inaccurate billing leads to customer dissatisfaction and back office workload spikes
- Manually intensive tracking of actual work performed wastes time and is inefficient
- Lack of ability to accurately forecast revenue

Westernacher Warehouse Billing Solution further extends the SAP Extended Warehouse Management (EWM) solution by providing comprehensive support for warehouse billing processes. **It provides LSPs with the functionality that they need to take strategic decisions and change their billing into an exact science.**

KEY STRATEGIC QUESTIONS

- What impact will new contract terms have on billing and revenue?
- How can I achieve complete cost transparency and always know the exact services we have provided, for each customer and the resulting revenue?
- How can I efficiently bill customers for services rendered based on individual contract agreements?
- What impact will individual customer specific rates and billing strategies have on our bottom line?

Westernacher - Strategy, Process and IT-Consulting since 1969.

WESTERNACHER SERVICE PORTFOLIO

- Strategy and process consulting
- A dedicated business intelligence practice
- SAP feasibility studies

As Westernacher Warehouse Billing Solution **is deployed as a packaged solution, immediate benefits can be realised.** It is a comprehensive activity-based solution that uses highly adaptable rules to calculate rates and charges.

With seamless integration into the **SAP ERP backend** customers can be billed based on individual contract agreements. All warehouse activity can be tracked for onward billing. These activities include: **receiving, put-away, replenishment, picking, packing, staging, loading.** **Additional allocations based on warehouse rental, space consumption and equipment usage can also be accurately tracked and billed.**

SAP® Certified
Powered by SAP NetWeaver®

Westernacher Warehouse Billing Solution built on SAP EWM technology

Key Benefits

- Activity and consumption based billing to replace arbitrary allocations and estimates
- Highly automated billing processes to replace manual billing
- Real-time sales and revenue reporting through tight integration with SAP components
- Ability to cater for individual contract terms per customer
- Penalty calculations can be performed for exceeding load or contract terms
- Integration of various customer specific services to bill
