SECURE HOSTING WITH EPG

Increase your logistics' efficiency and reduce your costs with the flexible cloud solutions from the EPG.

EPG | CLOUD allows you to select the services you need and protect your investment budget. You can, for instance, profit from an access to your LFS applications in the EPG partner cloud and the simple and quick adjustment of the computing power when adding new clients.

You would like to continuously extend your cloud? No problem. With the partner cloud, we have introduced a concept for maximum flexibility that grows with you. In addition, a backup system is always part of the customized infrastructure, also as a high-availability and high-performance solution.

Please contact us if you need an analysis of your individual requirements.

PRODUCT
FACTSHEET

EPG® | Ehrhardt Partner Group
Smarter Connected Logistics™

WE OFFER YOU A COMPREHENSIVE PORTFOLIO FOR OUTSOURCING YOUR LOGISTICS IT:
HOSTING, MANAGED SERVICES AND CLOUD COMPUTING.

Hosting

Within the frame of our hosting services, we offer you computing power for EPG | LFS on state-of-the-art IBM machines. The infrastructure is located on a high-security campus with access restrictions in spatially separated buildings. It provides of separate fiber connections with redundant connections in the European backbone network for maximum security. The computer center fulfills all legal requirements of the European Data Protection Act.

EPX computer center

- ✓ Access restrictions
- ✓ EPG | CLOUD made in Germany, Karlsruhe
- ✓ Spatially separated buildings
- ✓ Separate fiber connection with redundant connections in the European backbone network
- ✓ Tier III+/ISO 27001 classification

Managed Services

These services, among others, include key user operations for the definition, modification and deletion of system users. They also include data backup, printer configuration and LFS support. Together, we develop a customized cloud solution that increases your competitiveness and reduces your costs.

Cloud Computing

We offer you an on-demand infrastructure, like computers, memory and networks as well as on-demand software like operating systems and the warehouse management system EPG | LFS. EPG provides the pre-configured warehouse management system and maintains it according to your individual requirements. The decisive advantage: You can focus on your core competences. Hardware investments are reduced and your logistics flexibility is increased.

THE ADVANTAGES AT A GLANCE:

- ⊞ Profit from high flexibility, availability and security for your LFS application
- ⊞ No commitment of resources for server management
- ⊞ Reduction of your IT purchase and operating costs
- ⊞ Individual configuration of our hosting solutions – tailored to your need
- ⊞ You can focus on your core business
- ⊞ Business scalability: adjust your capacities to your customer's requests
