

WAREHOUSE MANAGEMENT SYSTEM EPG | LFS

Your smart, comprehensive solution for
warehouse management

PRODUCT FACTSHEET

The modular warehouse management system EPG | LFS is one of the most powerful warehouse management systems in the world and can be used across all industries. Its high degree of individual adaptability (customizability) to the requirements of the most diverse of industries and customer requirements ensures efficient management and control of your logistics processes.

WAREHOUSE MANAGEMENT SYSTEM EPG | LFS

WAREHOUSE MANAGEMENT MADE EASY.

EPG's LFS warehouse management system stands for smart, connected warehouse management. An important factor in digitised logistics is the seamless mapping of process and information flows across the entire supply chain.

We help you to plan and control your entire flow of logistics materials and information, and to manage operational planning of your staff and all available resources. The warehouse management system **actively guides** the movement of all manual and automated storage units.

LFS makes sure that you increase your process workflow efficiency and allows not only for noticeable savings but also for long-term ease of maintenance at a low cost. Our warehouse management solution is designed and suited to all types of use, from simple warehouse management applications to sophisticated logistics processes (in the form of a warehouse management system).

SATISFIED CUSTOMERS ARE WHAT WE MOTIVATE OUR ACTIONS.

INDUSTRY 4.0: SMART, CONNECTED, DIGITISED.

Modern IT systems are now the decisive competitive factor in logistics, and also the key to meeting the challenges of increasing market demands and the pressure of rising costs. Connecting your supply chain in a smart way has become the order of the day: from machines to warehouse hardware and technology, to staff, and all the way to the entirety of your IT tools. EPG | LFS serves as the main communication interface, linking the various technologies used in the warehouse and making sure that all participatory systems interact in a smart way: from label printers to sophisticated materials handling technology, all the way to AGVs and robotics solutions.

ALL INDUSTRIES

Our software offers a variety of industry-specific packages, thereby ensuring that the system meets all of your needs perfectly. You focus on your core business; let LFS handle your warehouse management.

EXPANDABLE MODULES FOR YOUR WAREHOUSE MANAGEMENT

When your requirements change, we will quickly adapt LFS to these new conditions. Additional modules are needed? The easily customisable warehouse management system ensures maximum flexibility and expandability.

INTERNATIONAL USER INTERFACE

At this time, LFS is available in 16 languages and in use across the entire globe, with the user interface ensuring intuitive usability. Take a look at the many prestigious international organisations already using our system.

ALL PLATFORMS AND DATABASES

The LFS warehouse management system runs on all commonly used platforms and mobile application operating systems. It can also easily be used with industry-leading databases. Communication interfaces to all common ERP, WWS and PPS systems are of course included in the warehouse management system, as are services for use in SOA environments.

MULTI-CLIENT AND ENTERPRISE READY

Connecting new sites and facilities is quick and easy, as is adding new clients. Our licence model is flexible, meaning one license for all your sites.

WORLDWIDE SUPPORT

Regardless of the LFS software version your organisation is using: we guarantee worldwide 24/7 support for our software solutions. Our service experts always have to meet the highest quality requirements in the form of continuous training.

EPG – SMARTER CONNECTED LOGISTICS™

EPG (Ehrhardt + Partner Group) is one of the leading logistics experts and employs more than 640 people at 17 locations worldwide. The company was founded in 1987. The basis of its success is the warehouse management system EPG | LFS, which is today used by more than 100,000 users for their logistics management. Over the years, the group's software portfolio has developed into a fully comprehensive **supply chain execution system** and enables networked control of all manual and automated logistics processes (WMS and WCS) - in the warehouse and on the road (TMS) - including resource and employee deployment planning (WFM). In addition to EPG | LFS, EPG offers Lydia® Voice, an efficient and ergonomic solution for voice-guided processes in logistics, industry and main-

tenance. Lydia® Voice works on the basis of neural networks and AI components and is therefore a technological leader. In addition to these core products, private cloud solutions, logistics planning and consulting as well as all services and support related to warehouse hardware and infrastructure complement the overall solution portfolio of the internationally active group of companies. EPG also has its own training centres, the Logistics Solutions Centers (LSC), at the headquarters in Germany and in Dubai for training and further education of employees and logistics experts in practice. About 1,500 customers from all industries trust in the expertise, the cross-divisional offer and the know-how of the EPG.
