POWER UP YOUR STAFF

STAFF QUALIFICATION WITH THE LFS.ACADEMY

LFS OFFERS MANY FUNCTIONS THAT CAN SUPPORT AND OPTIMIZE YOUR PROCESSES.

As a member of the Ehrhardt + Partner Group, the LFS.academy has practical experience from more than 300 successful international projects.

The objective of the LFS.academy is to form logistics and LFS experts with detailed and comprehensive training.

You can choose from more than 30 courses and workshops to compose an individual training program for your employees. Your advantages:

- Make your warehouse managers fit with the courses “User interface graphical warehouse dashboard” and “Configuration graphical warehouse dashboard”. An optimum configuration of the LFS Transport Control System allows you to make full use of your transport resources.
- Qualify your system administrators with our system and IT courses, for example “Print management in LFS”, “XSLfast” or “Interfaces”.
- Gain advantages as a decision-maker and manager: Learn how LFS can help you save time and money in stocktaking.

Do you have to quickly evaluate a large amount of data? Learn how to create reports and analyze data using the modules “Logistics Intelligence Portal” and “Quick Report”. These tools will help you make well-founded decisions quicker.

Profit from the high-quality courses, seminars and workshops of the LFS.academy!

Overview of the entire training program

Our training team

Equipment and rooms

In our logistics training center, tomorrow’s standard technology is already available. Profit from this competitive edge that will take your warehouse logistics to the fast lane.

Our 500 sqm large warehouse and the training rooms in Boppard-Buchholz near Coblenz offer practice-oriented equipment that makes them the ideal premises for the courses:

- The warehouse offers seven different rack types, from shelves across flow racks to shuttle systems.
- Different handling unit types and items create a realistic environment.
- Putaway, relocation and retrieval processes can be carried out using electrify forklifts and pallet trucks.
- The warehouse offers goods receiving, packing and dispatch zones.
- The technical equipment comprises PC workstations with scanners, list and label printers (also for bar codes), a radio frequency system with forklift and picking terminals as well as mobile radio scanners.

Our training team – practical experience and system know-how combined

The LFS.academy training team consists of experienced logisticians and specialized experts. The practical knowledge transfer enables the participants to get the most out of LFS.

The seminars are exciting and authentic – from practice for practice.

Compose your own training package. On our website, you will find all courses. Of course you can also give us a call – we will be glad to help you!
