

Support of TRIMET Aluminium SE in Specification creation and WMS provider pre-selection

Initial situation

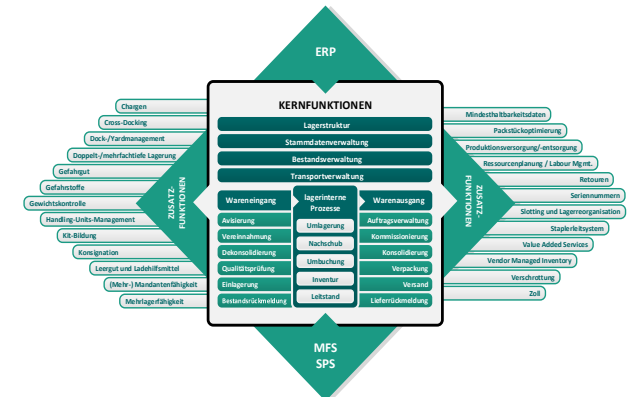

- Trimet Aluminium SE is a production company for the manufacture of light metal products from aluminum with approx. 2,300 employees
- The planning of future integration of Industry 4.0 components such as AGVs in the warehousing area and production supply requires a short- to medium-term replacement of the existing and self-developed developed warehouse management modules to meet current and future requirements.

Project content

- Design of the WMS target processes
- Creation of a WMS specification sheet
- WMS benchmark by means of the »WMS Online Selection« and presentation of suitable providers for the subsequent tendering phase

Results

- WMS specifications and WMS provider pre-selection for the Essen site in preparation for the subsequent tendering phase
