

About Element Logic

For over 40 years Element Logic have been optimizing warehouse performance. Our experience is the key to your success.

Element Logic® is a global technology company specializing in intelligent warehouse automation. Since its founding in 1985, the company has grown to employ over 950 people across 30 countries and has established itself as the first—and leading—AutoStore™ partner worldwide.

Renowned for its commitment to innovation and people-centric approach, Element Logic enhances warehouse performance through a unique combination of cutting-edge technology, AI-powered software, and tailor-

made solutions. This enables businesses across industries to improve efficiency, accuracy, and scalability in their logistics operations.

With a proven track record and deep expertise in intralogistics, Element Logic has become the go-to partner for organizations seeking to gain a competitive edge through automation. The company's culture is rooted in bravery, passion, and reliability—qualities that continue to drive its mission of optimizing warehouse performance.

ELEMENT LOGIC

OPTIMIZING WAREHOUSE PERFORMANCE
elementlogic.net

Real-time Data Insights and Analytics

Smarter Insights. Faster Results.

The Element Logic Warehouse Intelligence System delivers real-time data and predictive analytics with seamless AutoStore/WCS integration—giving you the power to optimize every move.

Boost Workforce Performance:

Identify training needs and increase daily output.

Maximize Productivity:

Eliminate bottlenecks and streamline workflows.

Optimize Storage: Free up space and keep high-demand items ready.

Prevent Failures: Detect issues early and minimize downtime.

Picking and Packing

Pick Smart. Pack Fast.

Speed up order fulfillment with efficient picking and packing.

Element Logic Warehouse Software enables smooth workflows, real-time system updates, and flexible handling for all outbound processes—fully integrated with AutoStore, robotic piece-picking, and material handling solutions.

Returns and Replenishment

Simplify Returns. Replenish Stock Fast.

Quality check, repackage, and restock—prioritizing fast-movers for maximum availability.

Element Logic Warehouse Software orchestrates automated systems and robots to streamline every step of returns and replenishment.

Shipping and Outbound

Control Flow. Deliver Precision.

Orders move seamlessly through the material handling systems, ensuring efficient dispatch.

Element Logic Warehouse Software tracks, sorts, and routes orders through integrated systems—giving you full control and visibility to optimize outbound flows.

Receiving and Inbound

Start Smooth. Move More.

Streamline stock intake with automated scanning, quality checks, and smart labeling.

Element Logic Warehouse Software directs goods to the right storage area and gives you real-time visibility to track and optimize every step.
