# CIO Services

## HOW MANY ESSENTIAL ACTIVITIES IN YOUR COMPANY RELY ON INFORMATION SYSTEMS?

Actually, the vitality of companies and projects is linked to services supplied by IT. The **Chief Information Officer** has a key role in the performance trends of companies. Beta 80 Group has always worked alongside with Italian and international company's CIOs, and has developed an offer dedicated to IT departments, regardless of the specific market sector.

For a number of years, Beta 80 Group's professionals have been taking part to ITIL board and actively contributed in defining referral standards in the **Cloud Computing** environment.

### IT Consulting & Auditing

IT at the service of  
business:  
where and how

### IT Governance

Standard and Best  
Practices: rules and  
examples to support  
success

### IT Operation & Automation

Simply large tools for  
large infrastructures

### IT Outsourcing

IT as a "turnkey"  
service, all inclusive

### Software Factory

Like in large  
factory: guaranteed  
products, with a  
quality brand

# Business Solutions

## SOLUTIONS WHICH GET TO THE CORE OF BUSINESS.

Among the many technologies nowadays available, it is essential to be able to select and utilize them at their best. We carry out research and constant experimentation, as well as calling ourself into question with the market: we learn from our clients, in order to aim at goals which are ambitious and gauged, as well as special and detailed. A business solution speaks the business language, provides what is needed, when it is needed.

It can, for instance, follow whoever is using it, becoming thus **Mobile**.

### BI & EPM

Information which drive business, performances which gauge enterprises

### ECM & Semantic web

Contents have a value if they are available, accessible and usable

### CRM & Social

Business is continuous relationship with clients, constantly updated

### BPM

Controlling company's processes means managing the company
