

# EPG | TIMESQUARE – LOGISTICS INTELLIGENCE AND ANALYTICS

## EPG<sup>®</sup> TIMESQUARE

- ✓ Gain maximum transparency with real-time monitoring
- ✓ Flexibly create your own dashboards
- ✓ Get proactive notifications of critical situations on your mobile device
- ✓ Consolidation of your systems across locations and versions in one dashboard
- ✓ Identify potentials for optimisation early
- ✓ Integrate data from external systems

## AT A GLANCE: THE DASHBOARD FOR PROCESS MONITORING

How do I keep track of the increasingly complex logistics processes in my warehouse? How do I ensure transparency to identify critical situations early and initiate the appropriate countermeasures?

EPG | TIMESQUARE is the intelligent cockpit for process monitoring and responds precisely to the challenges of the warehouse control centre. Our dashboard lets you monitor all of the areas in your warehouse in a comprehensive way, such as incoming goods, outgoing goods, order picking, etc. You can flexibly combine different configuration options to meet your needs. Centralise the dashboards of different storage areas on one interface and get the maximum overview.

## EPG | TIMESQUARE – YOUR SMART SOLUTION

Take a journey through time with EPG | TIMESQUARE: Keep the focus on **current events** in your logistics company and receive proactive information of impending bottlenecks. Logistically relevant data from the **past** can be collected and visualised. Based on historical data, now look to the **future**, identify patterns and trends, and derive specific recommendations for action. There is no need to worry about large amounts of data. By using the latest technologies, data from a wide range of areas and systems can be combined, analysed and made available quickly and easily for the optimisation of all downstream processes.

## THE FUNCTIONALITIES OF EPG | TIMESQUARE

- Intuitive layout of your own dashboard
- Visualization of web content
- Overview of the entire logistics process chain
- Flexible combination of data, filters, and charts to create templates
- Definition of threshold values to avoid critical situations
- Direct integration into EPG | LFS and thus direct access from the dashboard to the operative business
- Available as a mobile app and therefore usable from any location

## MAKE USE OF THE BENEFITS OF EPG | TIMESQUARE:

- + Lower your costs and minimise risks by viewing different time segments (past, real time, future)
- + Integrate and visualise internal and external products
- + Create easy, transparent and flexible layouts for your dashboards
- + Centralised installation in the cloud for version-independent integration
- + Ongoing provision of the latest updates and templates in the cloud
