**Supply Chain Software:** An all-encompassing suite of Supply Chain Software designed to help manufacturing and distribution organizations to maximize space, improve efficiencies and increase productivity across the entire business with WMS, TMS, YMS and DOM.

**Voice, Vision & Mobility:** Solutions to re-engineer and improve processes while optimizing business efficiency.

**Robotics:** A suite of robotic solutions to respond to today's supply chain demands, optimize floor operations, transportation, processing, fulfillment and staff safety.

**Software Consulting & Implementation:** A full range of high-level services to enhance both the efficacy and efficiency of systems and the staff responsible for them, supporting your company's supply chain from end to end.

**Planning and simulation:** For planning and simulating warehouse logistics, you can quickly and easily test new configurations and changed operations in a computer model.

**“Integrative solutions along the entire supply chain are of high relevance. This makes it all the more important to position yourself for the future – with the right solutions at the right time in the right place.”**

Michael Brandl / CEO EME Infios
