

**WE HELP COMPANIES
BECOME
MORE PROFITABLE**

Leanware/

Your partner in a digital world

**DID YOU KNOW THAT LOSS IS
LURKING IN EVERY COMPANY?**

Loss consumes company resources, which erodes competitive advantage and profitability. Loss hides in familiar procedures and threatens the success of the entire business.

Leanware team members will track down loss. We'll use superb efficiency to analyze even the most complicated business processes and find the loss. We'll then design a more efficient process and enable its implementation.

TAKE ACTION IN ELIMINATING LOSS.

We'll help you.

OUR CORE COMPETENCE

Our core competence is to improve process efficiency by building information systems that support the business and...

1. Seamlessly direct the customer process while being easy to use.

- > Directing people in different operating environments (mobile/floor, machinery and offices).
- > Controlling automation so that different automation systems and people are seamlessly working together in the process
- > Integrating to other information systems, so that they create a fully intact information system architecture and the correct data is always available at the right place at all times.

2. Visualize comprehensive situational awareness of customer operations, in addition to providing important information and trends for the longer term, which is necessary for continuous improvement.

- > Collecting and saving data on the operations of people and equipment and connecting it to other company data in a meaningful way.
