warehouse-logistics.com

A leading logistics platform for logistics IT selection

»As part of the annual renewal of the validation signet, we take a critical view on our system and its features. This is a valuable ongoing process which not only our customers benefit by. In this process, we are a bit more proud that Wanko Suite was the first logistics software to be fully validated for all three areas of warehouse, transport and telematics.«

Frank Leiter, Sales and Marketing Manager Wanko Information Logistics

»The cooperation with the warehouse logistics team is open and always balanced with a high level of interest in the best possible transfer of information. The WMS database and the framework around it offer an excellent technical platform.«

Matthias Nater
Solution Advisor Logistics
Presales Digital Supply Chain & Manufacturing
SAP Germany SE & Co KG

»Exchanging views with participants and WHL colleagues about innovative subjects and market developments is an important part of the process and assists with strategic orientation in the markets.«

Fin Geldmacher,
Executive Director,
prismat GmbH
